

# 3-3-9

## Dormant Feed

Healthy Gro™ 3-3-9 Dormant Feed is a natural source of high-grade nutrients designed to replenish primary and secondary soil elements. 3-3-9 Dormant Feed adds organic matter, proteins, humates and carbohydrates for maximum plant health and soil life. 3-3-9 Dormant Feed provides controlled release nutrition for plants providing optimum winterization. 3-3-9 Dormant Feed is high in available phosphorus (P) and potassium (K) to promote root development and plant health. 3-3-9 Dormant Feed contains 10% Calcium (Ca) further strengthening plant cells increasing disease tolerance and improving soil structure.

### Guaranteed Analysis 3-3-9

Total Nitrogen	3.0%
.0 % Water Insoluble Nitrogen	
Available Phosphoric Acid (P2O5)	3.0%
Soluble Potash (K2O)	9.0%
Calcium (Ca)	10.0%

Derived From: Aerobically Composted Chicken Manure (ACCM), sulfate of potash

Net Weight

### Application Rates

#### Greens, Tees

Apply 25 lbs of 3-3-9 per 1000 sq. ft. in late fall or early spring. Turf should be near or at a dormant stage to provide best results.

#### Fairways and Roughs

Apply 1100 lbs. per acre in late fall or early spring. Turf should be near or at a dormant stage to provide best results.

#### Plant Nutrition Values: Per 1000 sq. ft. / Acre

Rate	# N	# P	# K	# Ca
25#/1000	.75	.75	2.25	2.5
1100 #/acre	33#	33#	99#	109#

#### **Application Equipment:**

3-3-9 Dormant Feed is designed to be spread using bulk application equipment. Spreader setting should be calculated utilizing manufacturers suggested settings based on the bulk density of the product.

#### **Use Precautions:**

Apply to dry turf. 3-3-9 Dormant Grade is designed to be applied when no further play is expected.

#### **Warranty Limitations**

Pearl Valley Organix warrants that the product conforms to the specifications on its label. User assumes all risks associated with its use.
