

# FAIRWAY PLUS

## 20% Calcium

### Liquid Calcium Suspension

**Guaranteed Minimum Analysis**

Calcium (Ca) .....	20%
Derived from Calcium Carbonate	

**Product Description:**

- 20% Calcium is a stabilized liquid form of calcium carbonate that may be applied by spray rig or through irrigation water.
- 20% Calcium is important in maintaining proper Base Saturation Levels of anions that populate the soil colloids.
- 20% Calcium causes the release of the sodium to soil bond reducing salt content of soils.
- 20% Calcium may not be compatible with Ortho-Phosphate based compounds. Prior to mixing with any other fertilizers or chemicals, a compatibility test should be performed.

<b><u>Use Rates</u></b>	
Golf Course Fairways Athletic Fields	Apply 1 to 5 gallons per acre in a minimum of 40 gallons of spray solution per acre. Application may be repeated on a two to four week basis. Transition and Warm Season turf may require more frequent applications
