

Organic Base Nutrition

ProGro Organics are manufactured with quality ingredients, and designed to meet the demands of intensively managed turfgrass by providing a food source for both the plants and the soil life.

ProGro Organic Base Nutrition products can be custom designed to meet specific and unique agronomic requirements. Contact your **ProGro Agronomist** for information.

3-3-9 Hi K

ProGro Organic 3-3-9 Hi K utilizes ACCM Compost as a base ingredient. It is a homogenous product formulated with additional sulfate of potash and ammonium sulfate. ProGro 3-3-9 Hi K will aid in replenishing base saturation levels of potassium, while providing a controlled release nutrient feed. ProGro 3-3-9 is an excellent choice for dormant feed.

Use Rate: 200 to 1100 lb. / acre

Organic Based Dry Fertilizers

7-3-7 with Iron

PROGRO Organic 7-3-7 with Iron utilizes ammonium sulfate, sul-po-mag and sulfate of potash to enhance the base compost. It is a homogenous formulation that provides a quick acting nutrition source and the benefits of the base compost.

PROGRO Organic 7-3-7 with Iron is rich in humates, proteins, carbohydrates, and trace minerals for healthy soil and prolonged feeding.

ProGro Organic 7-3-7 is recommended for use in the early summer and beginning again in early fall.

Use Rate: 250 to 450 lbs. / acre

ProGro EnviroBlend Dry Fertilizers

Designed to reduce the impact on the environment by utilizing technology that reduces leaching, volatilization and waste. Organic fillers are used to enhance soil microbial life and activity. ProGro Enviro-products contain no phosphorous.
