

**IMD 75 WSP** is an odorless, safe, season-long broad spectrum insecticide with control against many turf pests including white grubs, bluegrass weevil, mole crickets and cut worm suppression. In addition Armor Tech IMD 75 is effective on numerous ornamental pests including aphids, borers, whiteflies, scale insects, lacebugs, leafminers and mealy bugs.

**Use Rate:**

6.4 oz / acre

4 x 4 x 1.6 oz case (4 acre) 48 x 4 x 1.6oz case (12 acre)

**ALOFT®** provides a One-Two Punch

1. Bifenthrin provides a quick knockdown of early-season adults, including black turfgrass atenioides, annual bluegrass weevil, cutworms and bill bugs as well as surface-feeding pests like chinch bugs, armyworms and sod webworms.
2. The outstanding systemic and residual activity of clothianidin provides preventive, season-long control of all white grubs, plus control of any escaped larvae from early-season adult of surface-feeder eggs laid prior to ALOFT application

**Restricted Use Pesticide**

2.22 lbs clothianidin 1.1 lbs bifenthrin per Gallon 64 oz / cs

**Use Rate:**

.27 to .44 oz / 1000 sq ft

**Menace 7.9% bifenthrin flowable insecticide** is a liquid concentrate containing 7.9% bifenthrin for the control of a wide variety of insect pests in nearly all residential and commercial settings. Menace 7.9% Flowable is a fast-acting synthetic pyrethroid with low to no odor and provides quick "knock-down" of insects, quickly ensuring healthier turf and public environments. It acts by paralyzing the nervous system of insects, but the active ingredient is not absorbed by plant foliage.

**Restricted Use Pesticide**

**Use Rate:**

10 to 20 oz / acre

Acelepryn™ is high performing, granular insecticide / fertilizer product that provides environmentally- smart grub control. It has been classified as a **EPA Reduced Risk** for turf applications and has a low impact on non-target organisms such as beneficial arthropods as well as bees, birds, fish and mammals. **Acelepryn™** has the lowest solubility of any white grub control product on the market.

***What does this mean for you?***

Allows Professionals to save money by controlling multiple pests with a single early application, while eliminating subsequent treatments.

Controls:
